Subject: Budget

As you can see there is 100% conventional wisdom on keeping the budget frame .

As you know , it is stupid beyond any imagination and this view is shared by all the smart guys who have not seen the crisis coming ; have not realized its depth ; and will be shocked to see the double deep major recession hitting Israel and the world again (see Obama's out of line speech to the joint session of Congress on Thursday) .

By calling to a brave act dealing with the budget to respond to the protest and the looming recession , you will be the only voice to be adopted by the protesters and will be on all headlines , getting support from most media commentators (see TheMarker).

This is the time and the window !!!

Best

Avi
